

Simple Listening

Jack Ricchiuto

Simple Listening is an invitation to expand the possibilities of your listening. It's an invitation for listening to be easier, more interesting and connecting.

When we merge together in spaces of shared understanding, it's because of the quality of our listening. When we do great things together, it is because of listening we do well. In listening well, we become smarter and more caring together.

This exploration will make it possible for you to become more conscious of your listening opportunities and options as never before.
